Bold Profile

EDUCATION

Bachelor's Degree, Computer Science
Belgrade University, Belgrade
August 2017
Graduated with high honors in 2017.

LANGUAGES

Serbian (Native)

English (Highly proficient)

VLADIMIR JANKOVIC

PROFESSIONAL SUMMARY

Blockchain specialist with comprehensive experience in developing and implementing decentralized applications and smart contracts. Proven ability to drive project success through collaborative teamwork and adaptability to changing requirements. Strong expertise in Solidity, Ethereum, and Hyperledger, with focus on security and scalability. Known for delivering results that enhance operational efficiency and foster innovation.

WORK HISTORY

September 2018 - Current
Rojal Company - Blockchain Developer, Belgrade

- Developed smart contracts that enabled automated execution of business processes with minimal manual intervention
- Built a permissioned blockchain network that enabled secure data sharing between multiple organizations
- Utilized cryptography algorithms to ensure secure authentication and authorization of users
- Implemented a consensus algorithm that enabled the network to come to an agreement on the validity of transactions
- Developed a secure wallet that enabled users to store, transfer, and manage digital currencies with ease
- Utilized distributed systems principles to design and develop decentralized applications
- Built a secure messaging system that enabled encrypted communication between users on the blockchain

September 2017 - August 2018
Tehnička škola - Full-Stack Web Developer, Obrenovac

- Developed a RESTful API that served as the backend for a web application, improving scalability and reducing latency by X%
- Developed a modular, single-page web application in Angular that incorporated responsive design principles
- Developed a full stack web application from scratch, including back-end services, front-end interface, and database
- Created a reusable component library for the web application using Angular Material, resulting in faster development time for new features
- Incorporated third-party APIs into the web application for data exchange and real-time updates

SKILLS

- Solidity
- React.js
- Node.js
- MySQL
- JavaScript
- PHP
- CSS3
- IPFS integration
- Cryptography fundamentals
- Rust
- Next.js
- Web3.js
- MongoDB
- TypeScript
- HTML5
- Trading Strategy
- Tokenization concepts
- Cross-chain solutions

COURSES

Node.js, Express, MongoDB & More: The Complete Bootcamp, Oct 2017 - Nov 2017, Udemy
